

# BELFAST

The film talks about the life of a working-class protestant family in Belfast during the late 1960's precisely, the life of Buddy, the younger child of the family.

One day, a group of protestants attack the houses of Catholics in the street where Buddy lives. We follow him in his daily life as a child and we learn more about Northern Ireland

I liked it.

The actors are very touching. The film immerses us in the story. I really love dad because he just wants to protect his family.

I really recommend it, it's a very good film.

For me, the target audience is for all the family.

I give it four stars.
