

THE DUKE

Synopsis

On the 20th of September, the 1ere AMC classes went to cinema in Dinard to watch two films on the occasion of the British Film Festival. The first one was "The Duke".

"The Duke" is a film released in 2020 by Roger Michell and is inspired by real events. It talks about Kempton Bunton (Jim Broadbent) a senior unemployed, militant for free TV for seniors citizens and veterans. After not paying for watching TV without a licence, he was jailed for thirteen days at Durham. He decided to go to London to steal Goya's portrait of the Duke of Wellington in the National Gallery. He sent ransoms threatening to not return the painting if authorities don't exempt the elderly from audiovisual royalties. This story tells how a harmless pensioner ended up wanted by all the police in Great Britain

My Opinion

I really liked this film. The main character is very endearing and funny. The way the story is told with a lot of humor makes us feel comfortable and captivated. It's a good way to learn historical events; it's very instructive and rewarding.

I really recommend to watch this film with all your family, friends, siblings... It's a good movie for children too!
